Art Unit: 1733

- 1) Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 3-7, drawn to first embodiment wherein block has a chamfer portion as shown in figures 1-5, classified in class 152, subclass 209.15.

Group II, claim(s) 8-22, drawn to second embodiment wherein block has peripheral protuberant portion as shown in figures 6-8, classified in class 152, subclass 209.15.

It is noted that the original disclosure describes a third group (Group III). This third group (Group III) is drawn to other embodiment wherein block has protuberant portion at end edges and central portion of block as shown in figures 18A and 18B. This third group (Group III) is apparently not claimed.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I fails to require the special technical feature in Group II of the height of the block gradually decreasing toward the block end edge and also toward the central portion of the block. Group II fails to require the special technical feature in Group I of a chamfer portion having a straight line portion at a block central side and at least one curved line portion having a fixed curvature at a block end side.

- 2) A telephone call was made to Neil Siegel on 5-8-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

- 3) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
